CALIFORNIA ACCESS™

GAMING MOUSE SUNDA

Sunda mouse is equipped with 7 programmable buttons. Two keys located on the side panel allow you to freely change the values of the defined parameters. Above the clickable roller there are buttons for changing the DPI. The large main buttons are comfortable and their use does not cause a feeling of fatigue even after several hours of continuous "clicking". Impressive backlighting is provided by TrueRGB technology.

Solid and compact design
The Sunda mouse is designed to withstand even the most dynamic games full of excitement. The compact, sturdy design makes it hold well in the hand, and the individual components have been well-fitted together.

150 cm long braided cable
The 150-cm-long braided cable with gold-plated USB contact provides a perfect connection to your computer and a wide range of maneuverability.

Classic, proven design
Sunda CA-1045 is a gaming mouse with a classic design that will appeal to any gamer. The precision of movement is provided by the Sunplus 199IC optical sensor. The DPI resolution of this mouse reaches up to 6,400 DPI.

Striking TrueRGB backlighting
True RGB technology is responsible for the mouse's striking appearance on the desk. The gentle illumination of the edges and logotype makes the mouse look above average, while not distracting the player.

Programmable buttons
The mouse has 7 programmable buttons, which allow you to assign any settings to them. Located on the side panel, two buttons allow you to freely change the values of the defined parameters. The large main buttons are comfortable and their use does not cause a feeling of fatigue even after several hours of continuous "clicking". In addition, the Sunda mouse is equipped with a clickable scroll wheel.
