CALIFORNIA ACCESS™

GAMING MOUSE MOROMI

Moromi mouse is equipped with up to 8 programmable buttons. Three keys located on the side panel allow you to freely change the values of the defined parameters. An additional "Fire" button on the side is sure to come in handy for many gamers. The large main buttons are comfortable and their use does not cause a feeling of fatigue even after several hours of continuous "clicking". Impressive backlighting is provided by TrueRGB technology.

Robust and compact design
The Moromi mouse was designed to withstand even the most dynamic games full of excitement. The compact, solid design makes it hold well in the hand, and the individual components have been well-fitted together.

Braided cable 180 cm long!
The braided cable with a length of 180 cm and a gold-plated USB contact provides a perfect connection to your computer and a wide range of maneuverability.

Classic, proven design
Moromi CA-1046 is a gaming mouse with a classic design that will appeal to any gamer. Precision of movement is ensured by the PMW 3325 optical sensor, and the DPI resolution of this mouse reaches 10,000 DPI.

Striking TrueRGB backlight
True RGB technology is responsible for the mouse's striking appearance on the desk. The gentle illumination of the edges and logotype makes the mouse look above average, while not distracting the player.

Programmable buttons - Fire button on the side
The mouse has as many as 8 programmable buttons, which allow you to assign any settings to them. Located on the side panel, three buttons allow you to freely change the values of the defined parameters. The large main buttons are comfortable and their use does not cause a feeling of fatigue even after several hours of continuous "clicking". In addition, the Moromi mouse is equipped with a clickable scroll wheel.
