

GRIZZLY MECHANICAL KEYBOARD

Full-size mechanical gaming keyboard with True RGB backlighting and dedicated macro keys for professional gamers.

Additional capabilities

This keyboard is a real gaming combo. We've accommodated two additional 3.5mm mini-jack ports for headphones with microphone. Right next to them we placed a USB 2.0 port to which you can connect any device without unnecessary searching for a port on the case. So many possibilities, only in Grizzly keyboard!

True RGB backlighting

Grizzly keyboard looks exceptionally impressive on your desk thanks to True RGB backlighting. With 10 types of backlighting effects and an additional 4 modes dedicated to the most popular games, you can easily and quickly adjust it to your preferences. Do you like to set your own backlighting combination with different colors? No problem! The keyboard software available on the manufacturer's website will let you choose your favorite backlighting.

Program the backlighting to your liking

The keyboard allows you to program and store any 5 sets of keys. To do this, we first choose under which key our set will be visible. To do this, we press FN + 6 / 7 / 8 / 9 / 0. Then we start the programming mode by pressing FN + End and press the selected keys. We finish the whole process by pressing FN + End again.

Full Antighosting

The keyboard has full Antighosting. Practical tests show how useful this feature is in everyday use. Ghosting is the problem of some keyboard keys not working when several keys are pressed simultaneously. Pressed keys that do not appear on the computer or seem to disappear are said to have been 'ghosted'. Our keyboard is equipped with such technological solutions that prevent such problems from occurring.

Red mechanical switches

Macro and backlighting are not the only indicators of a keyboard's quality. The Grizzly keyboard is equipped with Jixian Red switches, which are equivalent to market-leading gaming switches. The durability and speed of the keys guarantees an edge in gaming.

Technical data:

- USB 2.0 interface
- membrane keyboard
- 5 macro keys
- True RGB backlighting
- full antighosting
- Jixian Red switches
- dimensions 470×180×40 mm
- weight 1500g (±10g)
- cable length 1.8 m
