CALIFORNIA ACCESS™

AGMA MEMBRANE KEYBOARD

Agma CA-1421 is a minimalist, membrane keyboard with a full block of numeric keys. It was created for gamers who expect the highest quality while playing. The compact design makes it look exceptionally solid and is extremely durable and rigid. The striking RGB backlighting will appeal to many gamers. The body of the keyboard is kept in matte black. The clear and vivid backlighting of the keys of the Agma keyboard makes it look exceptionally impressive on any desk.

Exceptional functionality

The Agma CA-1421 keyboard is equipped with functional multimedia keys, which allow quick and comfortable control of system functions. This is a solution recognized by gamers, which is gaining more and more popularity. The kit also includes a standard USB cable, which allows the player to connect his keyboard to a computer or laptop in the traditional way.

Classic design

When designing the keyboard, we followed tried-and-true classic solutions. Hence, the keyboard has a classic black color and balanced switches, which are great for everyday use - both for gaming and typing. Laser-cut key markings ensure that the keys will not wear out even after prolonged intensive use. The keys themselves are characterized by a high level of operational culture, so they will not disturb you even during an evening of gaming.
