CALIFORNIA ACCESS™

CAIMAN MECHANICAL KEYBOARD

Caiman CA-1422 is a mechanical keyboard with a full block of numeric keys. It was created for gamers who expect the highest quality while playing. The backlit edge makes the Caiman keyboard look fantastic on a gamer's desk. The compact design makes it look exceptionally solid and is extremely durable and rigid. The body of the keyboard is kept in matte black. The distinct and vivid backlighting of the Caiman keyboard keys makes it extremely comfortable to use.

Exceptional quality and striking backlighting
Caiman CA-1422 mechanical keyboard features exceptional backlighting along all edges of the device. As a result, it presents itself strikingly on the desk of a gamer who cares to emphasize the gaming character of his gaming station. The Caiman mechanical keyboard is equipped with durable switches that will meet the expectations of most gamers. The compact, solid design ensures stability and precision. In addition, the keyboard is equipped with multimedia keys that expand its capabilities and facilitate the use of many system functions.

Classic design
When designing the keyboard, we followed tried-and-true classic solutions. Hence, the keyboard has a classic black color and balanced switches, which are great for everyday use - both for gaming and typing. Laser-cut key markings ensure that the keys will not wear out even after prolonged intensive use. The keys themselves are characterized by a high level of operational culture, so they will not disturb the rest of the household even during evening gaming.
