

LACERTA MECHANICAL TKL KEYBOARD

Lacerta CA-1423 keyboard without numeric key block is an ideal solution for gamers who have limited space for gaming accessories or like compact solutions. It is for them that we created the Lacerta keyboard with the highest quality materials. Outemu Red switches with tactile click and activation will satisfy gamers who like that distinctive sound of mechanical keys.

TenKeyLess, or compactness at its best

Lacerta CA-1423 keyboard without numeric key block is an ideal solution for gamers who have limited space for gaming accessories or like compact solutions. It is for them that we created the Lacerta keyboard with the highest quality materials. Outemu Red switches with tactile click and activation will satisfy gamers who like that distinctive sound of mechanical keys.

Classic design

When designing the keyboard, we were guided by tried-and-true classics. Hence, the keyboard has a classic black color. Laser-cut key markings ensure that they will not wear out even after very intensive use.

Striking TrueRGB backlighting

True RGB technology is responsible for the keyboard's striking appearance on the desk. The gentle backlighting makes it look above average, while not distracting the player.

Technical data:

- USB 2.0 interface
- 87 mechanical keys
- Outemu Blue switches
- 12 multimedia keys
- 4 mm (± 0.5) key movement distance
- 50 g (± 5) of key pressure
