

GAMING HEADSET WITH DETACHABLE MICROPHONE

Anaconda is a gaming headset with a microphone that will provide an unforgettable gaming experience. The headset's design conceals 53mm drivers. Enjoy excellent sound quality in games and while watching movies. Deep bass, wide frequency response will make gaming and watching movies a real pleasure.

Let yourself be enveloped by the sounds of music in an even better way. The new version of Anaconda HQ headphones, means even better sound and higher comfort. The headphones have been designed for balanced weight and pressure distribution to ensure maximum comfort even for long hours of use. The improved round ear cups are made of extra soft sponge, completely enveloping the ears leveling out ambient noise. The metal headband housed in a soft sponge and plastic casing ensures that you don't feel unwanted pressure while using them even for long hours. The solid, compact design prevents vibration and crackling while listening.

Sensitive microphone with noise cancellation

The sensitive microphone with noise cancelling, has been placed on a flexible boom, so the player can adjust and adjust the distance from the mouth in a smooth way.

Customize to suit your needs

You can customize the Anaconda HQ headphones with a detachable microphone and turn your gaming headphones into comfortable music headphones. Anaconda HQ has a volume control knob on the cable, making quick decibel adjustments even easier!

High quality

Durability also applies to the headphones' wiring. From the output of the shell, to the 3.5mm jack plug, the cable is protected by a thick yet flexible fabric braid. In addition, a splitter for two 3.5mm jack inputs has been included.
