

GAMING HABU HEADPHONES WITH TRUE RGB BACKLIGHTING

Impressive gaming headphones

California Access™ Habu is a unique headphone designed for gamers for whom sound quality is important during gaming.

The comfort you expect

The headphones are equipped with 40 mm speakers with 108 dB dynamic range and wide frequency response for high quality sound. Soft cushions made of eco-leather give a feeling of comfort and do not cause pain in the ear area. The headphones are perfectly balanced, and the sturdy, self-positioning headband ensures an even fit across the head.

Sensitive, flexible microphone

Habu headphones are equipped with a sensitive noise-canceling microphone, which can be further maneuvered freely. The high quality and crystal clear sound allows you to communicate efficiently with other players in multiplayer games without unnecessary interference.

Round earcups mean gaming comfort for long hours

The headphones feature soft earcups with round cushions for comfort during hours of entertainment. The self-positioning headband gives you the ability to adjust the headphones to fit any head size. The sound of the headphones can be adjusted with a dial, and freedom of movement is provided by a 2-meter cable.

Striking backlighting

The Boa headphones have been designed in a modern design with TrueRGB backlighting, so they look striking during late-night gaming sessions and will make you put them on with pleasure!
